

Why We Need April's Federal Law

To rid the internet of predators that prey on children. In our efforts we have run into a peculiar problem with what we call "Legal Pedophile Web Sites". These sites are run mostly by child sex offenders that celebrate and promote crimes against children. The sad part is that they are protected by our 1st Amendment. As you know, the First Amendment cannot be touched. That is why we need the Internet Law, April's Law. This is groundbreaking legislation that we need passed. It will be the first attempt at an internet law to protect children from predators who conspire against them on-line. In our attempts to shut them down ourselves through public outcry, Petra Luna, our founder and leader of the effort, was threatened by the supporters of these "Legal Pedophile Web Sites," to be found, raped, sexually mutilated, drowned and killed. These are the kind of web sites and people that are protected by our First Amendment online. Did our forefathers die for this type of freedom? No, they died to protect children. This has become a serious safety issue. Below are just a few examples of the 1000's of these people and the web sites that they run.
